

NEVAS

**TRACE, LOCATE
AND VERIFY**

“ Our global investigations have allowed us to demonstrate our professionalism and lateral thinking to secure clients’ confidence ”

NEVAS
Trace, Locate and Verify

NEVAS have built their reputation on locating those individuals and assets that other tracing companies have either failed to find or who have subsequently provided outdated data to their client claiming a ‘locate’ or a ‘find’.

The majority of 'Trace and Locate' companies carry out an open source search and use data providers to access what is **'assumed'** to be correct information of the subject or assets address or location, which they then provide to the client as a 'locate'

The importance of client care is paramount to NEVAS, which is why we include within our trace and locate service a 'verification' which is our USP and allows the client peace of mind that the facts we provide to them are supported by real evidence.

Our global investigations have allowed us to demonstrate our professionalism and lateral thinking to secure clients' confidence in NEVAS and build on our 'blue chip' client base.

Should you wish to discuss how NEVAS can assist you in the locating and verification of individuals or assets then please contact us at-
